

Thomas Cochren Homes has been creating custom homes in this area for over 25 years. Their experience has enabled them to forge relationships with the top masters of craft, putting quality as top priority. For The Greystones development, two highly respected companies have come together with a common goal of excellence.

Linda Dunbar is a former co-owner along with Dan Desrochers of Leon's Insulation, a company founded by their father. She currently heads Developments By Dunbar bringing over 40 years of quality service, integrity and high standards to the building industry. Linda has a vision to create homes in a beautiful rural setting and collaborate with a custom builder that has an equal dedication and passion for construction.

Bringing together their technical and creative expertise, Tom and Linda are excited to present The Greystones, where each home will be custom designed and built with the foremost goal of customer satisfaction.
